

ACT Study

To explore thinking, memory, and learning

This research will explore the possible benefits of brain training in older adults ages 65 to 89

To learn more, please call 305-355-9200 and leave your name & phone number or email coainfo@med.miami.edu

You may be eligible to participate if:

- ▶ Willing to have 3 MRI scans of your brain over a 1 year period
- ▶ Free of implants or devices that would prohibit MRI scans
- ▶ Can come into our offices 5 days a week for 2 weeks for daily computer training, & 1 day a week for the remaining 10 weeks
- ▶ Free of pre-existing neurological or psychiatric brain disorders
- ▶ Free from any diagnosis like dementia or Alzheimer's disease

The study involves:

- ▶ Up to 2 weeks of daily training & 10 daily sessions of brain stimulation in the office, followed by 1 office visit per week for 10 weeks.
- ▶ Questions about your medical history, physical activity, thinking, memory, mood and daily activities, computerized memory tasks
- ▶ 3 MRI sessions with tasks to determine what part of the brain is used for thinking and memory
- ▶ Financial compensation
