The Center for Research and Education on Aging and Technology Enhancement (CREATE) at the University of Miami Miller School of Medicine is conducting a Field Trial. The objective of the research study is to test and evaluate the impact of a Personalized Reminder Information and Social Management (PRISM) system designed to support social connectivity, memory, skill building, access to community resources, and to support the well-being and quality of life of older adults.

The study will take place at your house and you will receive financial compensation for your time and effort.

You may be eligible to participate if you are:

- 65+ years old
- Live alone in an independent residence
- Plan to remain in the area for the next 12 months
- Do not work more than 5 hours/week
- Do not volunteer more than 5 hours/week
- Do not use computer/Internet in the last 3 months
- Have a telephone
- Speak English

This study is supported by the National Institute on Aging (NIA), which is part of the National Institutes of Health (NIH).
